***Reasons For Allowance***

The inner container 2 of Shutz has curved regions 82-85 in the front wall 9, the back wall 8 and both sidewalls 86, 87 that match the curved regions 78-81 of the floor pan 5. The corner regions in the front and sidewalls can not be fairly read as the claimed forward bottom portions. Figure 4 of Shutz shows that the bottom 12 of the floor pan 5 doesn't have ascending forward bottom portions to the front wall 23. The bottom 6 of the inner container 2 that rests upon bottom 12 doesn't have drainage surfaces. The transitions between the front wall and the corner regions to the bottom of the inner container can't provide any drainage function.
